

A THICKER AXLE YOU CAN PACK IN YOUR SUITCASE

I'm thinking about a new product. It's an axle barbell with a thicker grip section, OD 2.4" (61mm) vs the conventional 1.9" (48mm) axle bars. The bar is length adjustable and can be easily disassembled, the longest part after disassembly being 24". Weight 28 lb. Price will be about \$80.00, with free shipping within the US. Any comments and suggestions are very welcome. sherm@shermworks.com
